Lighting can be innovative or simple, but rarely does it excel at being both. American designer Shane Schneck strives for both, bridging the worlds of design and technology. The cleverly designed silicone lamp Bollard may look like a simple pendant, but it is in fact four lamps in one. Hang it from the ceiling as a pendant, angle it as spotlight, place casually on shelf or use to beam light up by placing on its foot.

About the Designer

Whether it's designing the perfect breadboard (with grooves to collect crumbs) or a genius multi-purpose lamp (check out the Bollard pendant light for Menu), Office for Design is discovering solutions for modern living. The Stockholm studio was founded in 2010 by the American industrial designer Shane Schneck, and since then has been collected companies including tech giants Google and Skype.
